

CROWDS AND NETWORKS

Crowdsourcing (2015) is a specific sourcing model in which organizations use contributions from Internet users to obtain needed services or ideas.

UPDATE: A thread devoted to confirming certain people as innocent

What is this subreddit? This is nothing more than one single place for people to compile, analyze, and discuss images, links, and thoughts about the Boston Bombing. There are many other places that such discussion is going on, including the original reddit discussion thread, 4chan, IRC (#bostonspeculation on irc.freenode.net), and many other places.

IMPORTANT

•r/FindBostonBombers is a *discussion forum*, not a journalistic media outlet. We do not strive, nor pretend, to release journalist-quality content for the sake of informing the public.

•The harsh reality is that discussion requires looking at all possibilities. But to equate discussion with an unambiguous implication of guilt is presumptive and hyperbolic.

•r/FindBostonBombers seeks a middle ground. A middle ground populated with debate

We give instructions to anonymous workers to realize webcam performances. The performers are hired through crowdsourcing services, so we do not know who they are, where they are, or even their motivations. The resulting videos are then dispersed on obscure, peripheral or forgotten social networks around the world, in Cambodia, Russia, China, South Africa...
